User Manual

Mugen Power 4200mAh battery case for iPhone 5 / 5S (Part # CC-iPhone5XL).

Thank you for purchasing Mugen Power battery case for your iPhone 5 / 5S. Now you will be able to get nearly 3X extra power while protecting your iPhone with the complete protection of a hard shell case.

Package Contains

- Mugen Power battery case
- Micro USB cable
- Pass-through headphone adapter

Compatibility

iPhone 5 / 5S

Charging the battery case for the first time

Please charge the battery case without the iPhone for 3-4 hours with the included USB cable before initial use. The USB cable can be plugged into your computer or any power source with a USB out.

Installing the battery case

Remove the top piece from the bottom master part of the case and slide the iPhone into the case properly and lock it in position by putting back the top piece.

How to charge your iPhone using the battery case

Turn on the battery case by pressing and holding the power button for 3-5 seconds. When your phone recognizes the battery case, a battery symbol will appear on the screen and you will a chirp from the iPhone. This indicates that the iPhone is charging and/or using the power from the battery case rather than from iPhone itself.
If your iPhone is drained of power, the battery case will first charge your iPhone. If your iPhone is fully charged, the battery case will act as your primary battery and no power will be lost from the iPhone internal battery until the battery case is depleted.

Checking the status of the battery case

To check the power status of the battery case, press the power button. The LED lights next to the power button will illuminate for several seconds.
4 LEDs – power is at 100%
3 LEDs – power is at 75%
2 LEDs – power is at 50%
1 LED – power is at 25%
LED flashing – the battery in the case is charging

User tips and warnings

- Keep your battery case dry and away from moisture.
- Avoid using the battery case in poor ventilation environment, such as jean pockets, purses, etc.
- Do not store or use the battery in a high temperature environment, including the direct sunlight heat.
- Do not disassemble the battery or attempt to modify it.
- Recharge your battery case once every month when not in use.
